Education

Lok Jagruti Institute of Engineering and Technology (LJIET)

B.E. – Computer Engineering (2022–2026)
Ahmedabad, Gujarat

Technical Skills

Skills

- MERN Stack
- Angular CLI
- NextJS
- HTML, CSS, JS
- Django
- TailwindCSS, Bootstrap

Tools

- GitHub
- Git
- VS Code
- Jupyter Notebook

Work Experience

● Salt Pixels — Web Development Intern [Company Website](#) | Mar 2025 – Oct 2025

- Collaborated on multiple live client projects such as [VenusInfra](#), [SmartHomesInfra](#), [Awfficacy](#), [Jindal Chemicals](#) and [DosBros](#).
- Developed using Angular CLI and ReactJS.
- Ensured optimal performance and scalability of client applications.
- Worked in an agile environment delivering production-grade code.

PROJECTS

● Pinterest Web (Mini Project) | Express.js, MongoDB, Tailwind CSS, EJS

- Created a Pinterest-like platform for users to upload and share images.
- Implemented authentication, image uploads, and database management via MongoDB.
- Built dynamic UI using EJS templating.

ACHIEVEMENTS & INTERESTS

- Built multiple full-stack web applications integrating APIs and 3D graphics.
- Passionate about full-stack development.
- Interested in exploring AI-powered interfaces and scalable web architectures.
- Certificate: IBM Front-End Development

- **eLitmus | React, Django (Freelance)**
 - Developed a full-featured online exam portal with CRUD functionality.
 - Integrated frontend (React) and backend (Django) for real-time data handling.
 - Enabled exam-taking, profile management, and result visualization.
 - **GalacticHub | React, React Three Fiber, Django, SQLite3**
 - Built a 3D interactive solar system model using React Three Fiber.
 - Integrated NASA API for real-time space data and visualized it in 3D.
 - Implemented Django backend for data scraping, API handling, and storage.
 - **InterioVirt | React, Fabric.js, Django**
 - Designed a 2D interior design tool with drag-and-drop functionality using Fabric.js and Canvas.
 - Developed Django-based backend for user authentication and project management.
 - Built REST APIs for seamless data flow between client and server.
 - **CarWrld | HTML, CSS, JavaScript, GSAP**
 - Designed a visually rich car showcase website.
 - Used GSAP animations for dynamic transitions and responsive interactivity.
 - **Sundown Studio | HTML, CSS, JavaScript, GSAP, Locomotive Scroll**
 - Created a modern, animation-rich website with advanced scroll effects.
 - Enhanced UX with GSAP-driven transitions and responsive design principles.
-
